

ABSTRACT OF THE DISCLOSURE

A rich communication profile system with notifications. The system is a feedback mechanism that utilizes rich content, *e.g.*, multimedia content, as one or more indicators that represent the status of a remote user. The system includes a state component that receives information relating to state of at least one entity. A notifications component dynamically renders at least one personalized graphical indicia representative of the entity's state. The entity can be a person, group of people, component, place, and object.
